E-mail : aleksandra.stevovic00@gmail.com
Telephone: (+381) 66427137
Date of birth 11th August 1991
Citizen: Serbian
Occupation: Student

Personal profile

I am strongly interested in the quantitative and qualitative aspects of mathematical modeling and actuarial mathematics: this is supported and trained by several projects experience in my studies, where I can combine my analytical skills with a more creative process of developing ideas. I have flair for programming and because of different approaches between subjects at my university I am trained in team playing just as much as in individual work.

More about me

I have passion for all kind of sports which is product of my 8 years long career in handball and 3 years spent in athletics. These sports helped me to become well-organized and good in individual as much as in team working. Dancing has became my hobby 3 years ago. I spent a lot of time dancing Latin dances like salsa, tango and bachata which gave me opportunity to meet new people and improve my skills. I am also interested in history and art which are the main reasons why I love drawing, reading books and traveling. All those activities made me open-minded, adventurous and person who always search for a new places, stories and cultures.
