MEDIA & APPLICATIONS (M&A)

**JOB DESCRIPTION:**

Services Engineer is an entry position for Ericsson in the Professional Services area.

The job holder will get specific on-the-job-training and experience to be able to work independently later on.

The job holder participates in the execution of work duties as described below, but does carry them out under guidance and with support.

---

**Work on Service Layer integration projects with the following responsibilities:**

- Requirements specification, analysis and design
- Solution development, implementation
- Solution installation, configuration and integration (work with the customer on-site, or from the back-office as a member of the integration team)

**Participate in the support activities related to the solution maintenance:**

- Support maintenance of the solutions
- Handling of upgrades of Ericsson or third party products
- Handling of error corrections
- Follow-up Customer satisfaction
- Interface with Ericsson's Global Service Delivery centre

**Qualifications:**

- Academic degree on bachelor level, in engineering (IT, telecom), preferably System Engineering or RTI
- Very Good Knowledge of the English Language (speaking & writing)

**Optional Technical Skills**

- Unix system administration and troubleshooting skills
- Knowledge of DataBases (e.g. Oracle, MySQL,...)
- Knowledge of IP networking, IP routing and IP security
- Knowledge of Web applications and ICT architectures
- Knowledge in scripting and/or programming languages (e.g. Java, php, C++, Perl ...)

If you are interested in the positions above and you believe that your qualifications correspond to the position's requirements, please submit your application/CV in English language through JobFair14 event site.

Kindly note that only short listed candidates will be contacted.
