

As part of TeleSign, the world leader in phone-based fraud prevention and intelligent authentication, TeleSign Mobile is poised to extend its track record of success within the mobile text messaging and telecommunications business.

With a global base of more than 1,000 customers, our expertise and technology is relied upon daily by many of the world's premier enterprises. These companies use the power of mobile to streamline business processes by communicating directly with their target audience. As always, our focus is on mission-critical SMS delivery, backed by a 24/7 support service, with industry-leading standards of customer care.

Continuing our vigorous growth, we are looking to build further by launching a portfolio of exciting new products in the year ahead. The TeleSign Mobile Engineering Team plays a key role in designing, building and maintaining the infrastructure which supports these services. The work is challenging, extremely rewarding, and essential to the success of the company.

In order for us to achieve our goals we need professionals who know their subject inside out, are highly motivated, and full of energy. Get on board and make a real contribution as our:
