My Ambitions (Cover letter)

During the course of my work on various projects and papers, both individually and with colleagues, I have had the opportunity to develop good organizational skills and the ability to coordinate and communicate in a team environment. I see my role in a team as that of an energetic initiator and someone who is able to successfully deal with any negativity that might arise, as I am a positive person and feel that being able to communicate well with my coworkers is my strong point. I am extremely committed to work and possess a great desire for obtaining new skills and knowledge, which I feel is something your company has to offer and I see it as a great incentive which would serve as added motivation for me to perform well and do my best.
