## Work experience

### Internship

Regulatory Agency for Electronic Communications and Postal Services- RATEL

July 2014 - July 2014

- Telecommunications
- Apprentice/trainee
- I had an opportunity to observe the work of the highest authority for telecommunications in Serbia, regulations and recommendations for the manner of using the radio-frequency spectrum, the penalty for violating any of these regulations, etc. For example, a company that was overlooking private property had a problem with their camera system that had interfered with car remote unlocking system. I was glad to hear about projects in my field of education and see the instruments they use. I had a chance to see a vehicle which RATEL engineers use for field monitoring and measurements.

### Volunteer

Jobfair 2013 (student`s organization EESTEC- School of Electrical Engineering)

September 2013 -  
November 2013

- Education
- Customer care and support
- Apprentice/trainee
- Assignment of this job was to represent the meaning of the Jobfair to the companies, and explaining to them why it`s good idea to invest in that project. As well as compaines have a good marketing, also students have an informations about companies in their field of interest, which is a win-win situation for both sides.

### Data entry into the database

Innovation Center (ICEF) at School of Electrical Engineering

September 2013 -  
December 2013

- Education
- Administrative
- Part time
- The task was consisted of monitoring and providing assistance with problems in data processing, as well as securing the safety of equipment. Because of being hard worker, I`ve got a promotion to the next level and got a bigger sallary. Due to the team work, the job was terminated with success and sent to Agency for further control.
