

Internship - Data Centre Engineer

About us:

As one of the region's largest telecommunications infrastructure services provider, CETIN Group drives digital transformation by providing cutting edge telecommunications infrastructure solutions.

The CETIN Group means four infrastructure operators - CETIN Bulgaria, CETIN Hungary, CETIN Serbia and CETIN in the Czech Republic with approximately 3000 employees. With the organization we are constantly working on improving and managing technology demands, our focus is to deploy the best-in-class telco infrastructure and meet challenging market demands.

CETIN Serbia is a provider of fixed and mobile infrastructure services to telco operators, internet service providers and other companies in the Serbian and regional market and was founded in 2020 after undergoing a legal separation from Telenor Serbia

ROLE OVERVIEW:

We are looking for an engineer who will help us plan existing and new data centers in Serbia. You will be part of a team that closely cooperates with both the Implementation and Operations Sectors on planning tasks.

If you're not sure if you should apply, see if the statements below apply to you. They don't have to be all of them.

- You used Cad or similar tools
- You used Excel
- You are ready to constantly learn and upgrade your knowledge

What we do:

We are responsible for Data Centres in Serbia in terms of space planning and infrastructure systems. Our priority is to plan the optimal use of Data Centres and plan infrastructure capacities in an optimal way and thus enable the efficient operation of the mobile network. In addition, we also provide services to wholesale customers.

What could you do:

You would work on updating documentation - layout plans of cabinets and cable routes (Cad), as well as layout plans of equipment inside the cabinet (Excel), control equipment consumption. During your engagement, you will see the application of your profession in the world of Data Centres, which may be a permanent commitment for you tomorrow.

MAIN REQUIREMENTS:

- You need to have a degree in construction or mechanical engineering or be in the final year of the same.
- It is desirable to be able to express yourself well in written and spoken English, but it is not mandatory.
- We are looking for a person with good planning and problem-solving skills, who responds quickly to requests and has a team spirit.

WHAT WE OFFER YOU:

- Working with talented people willing to share their professional knowledge
- Open working space and flexible working hours
- Paid internship and career development opportunities
- Laptop, mobile phone and tariff package in line with company policy
