Kosta Stanojević

Student of Software Engineering

About Me I am a third year student of software engineering at the School of Electrical Engineering in Belgrade. Currently, I am looking for practical experience in a real work environment, that will be useful for my further career.

Education and Achievements

2015 - now, School of Electrical Engineering, University of Belgrade

Majoring in Software Engineering, current grade 9.12

2011 - 2015, Mathematical Grammar School in Belgrade

Final grade 4.92

2012 - 2013, Science Center "Petnica"

Seminar on Electronics

2013 - 2014, Part of the Serbian national orienteering team

Placed first at the South-East European Orienteering Competition relay race

Software Skills

Most proficient in

- C\C++
- Java

Have also successfully worked with

- C#
- Pascal

At the moment I am getting familiar with Python through a personal project.

Experience

Worked on a team project in AES and DES encryption (C++)

Developed a program for parsing DNA sequences for use at the Medical school at the University of Belgrade (C++)

Made a simple operating system threaded kernel as a university project (C\Assembly)

At the moment working on my own project – A chatbot for the messaging app Telegram, capable of running a game of 'Warewolf' in a group chat (Python)

Have experience in working and coordinating team projects. Organised multi-day sporting events as part of the mountaineering and orienteering club "Pobeda", on both leading and non-leading positions

Languages

Serbian, native language

English, fluent

German, conversational

Personal Skills

Responsible, ambitious, eager for knowledge and new experiences

Able to work as part of a team or alone

Solid mathematical ability

Confident in my ability to learn anything I do not yet know
