WORKING EXPERIENCE

My work is mostly based on numerical simulations, high performance computing and statistical analysis. I'm passionate about researching, technology, taking on challenges and solving new kinds of problems. As a scientist, I'm very experienced in exploring, modeling and interpreting data by using various mathematical methods. Python is quickly becoming a standard for my colleagues and me working in astronomy, as a powerful and modular programming language. My previous experience and interests led me to apply for Data Science position in Microsoft DCS.

Research Assistant

Feb 2012 to present

Job description: distributed computing and simulations
Faculty of Mathematics, Department of Astronomy
University of Belgrade

Junior Researcher

Jan 2011 to Feb 2012

Job description: statistical analysis of supernova remnants
Faculty of Mathematics, Department of Astronomy
University of Belgrade

Scientific Project

Jan 2011 to present

“Emission nebulae: structure and evolution” (176005)
Financed by the Ministry of Education, Science, and Technological Development of the Republic of Serbia
(Basic Research: Earth sciences and Astronomy)
Project PI: dr Dejan Urošević

EDUCATION

Faculty of Mathematics, University of Belgrade, Serbia

Ph.D., Department of astronomy (Astrophysics Major), *Expected:* Winter 2017

- Title: *Modeling the radio evolution of supernova remnants by using hydrodynamic simulations and non-linear particle acceleration*
- Advisor: Urošević Dejan, Ph.D

M.S., Department of astronomy (Astrophysics Major), Sep 2011

- Title: *New Σ-D relation for Galactic supernova remnants*
- Advisor: Urošević Dejan, Ph.D

B.S., Department of astronomy (Astrophysics Major), 9.97/10 with honors, Sep 2010

COMPUTER SKILLS

DOS, UNIX, Windows, Linux
C, C++, OpenMPI, Python, Pascal, JavaScript, PHP, MySQL
MATLAB, Mathematica, Origin, IDL, ParaView, VisIt and others

LANGUAGES	English - full professional proficiency Russian - limited working proficiency
RESEARCH INTERESTS	particle acceleration at shocks, evolution of supernova remnants (SNRs), radio astrophysics, cosmic rays, magnetohydrodynamic and particle-in-cell simulations, high performance computing, statistics and Monte Carlo methods, machine learning
