---

Resavska 48, Belgrade, Serbia | 063/17-28-476 | momcilo@protonmail.com

## Objective

To learn about new technologies and better myself as a person while working an interesting job with good people.

## Education

**HIGH SCHOOL | 2009-2013 | SCHOOL OF ELECTRICAL ENGINEERING NIKOLA TESLA BELGRADE**

**SOFTWARE ENGINEERING DEGREE | 2013- | FACULTY OF ELECTRICAL ENGINEERING, UNIVERSITY IN BELGRADE**

## Skills & Abilities

### MANAGEMENT

- I excel at organizing my time so I can do the most of what I have planned with leaving enough wiggle room for unexpected developments.

### BILINGUAL

- Since a very young age I've picked up English as a second language and when you add my early access to computers it's understandable that I have a high proficiency in it. Serbian mixed with English is how I usually talk because a good part of modern technology doesn't have a translation.

### TECH SAVVY

- I've been around computers since early on in my childhood and have gone the path to study them properly. So there isn't much technology that I don't know at least something about.

### COMMUNICATION

- Working security I acquired experience on how to help people (both intoxicated and not) all while being friendly to them and making them understand how the rules work.

### LEADERSHIP

- I have no problem taking charge if need be but I prefer to work with the people I'm leading rather than just shout orders.

## Experience

I've worked occasional one-day jobs when I could find them.

Mostly physical labor (cleaning snow, constructing/deconstructing TV show sets, working security etc.).

I've also done some work online (filling out surveys, helping designers test their work, writing resumes and articles).
