

Miodrag Vladić

Student

I would describe myself as very persistent and determined person. I don't give up on my goals, but I also stick to the principles. In 2013, at age of 14, I ran my first half-marathon (21km), which made me to realize that everything in life is attainable with hard work and good will. I'm always looking for the easiest, but in the same time the most effective solution for the problem. I enjoy to working in a group, I rarely change my opinion under the influence of others, but I always respect other people's opinion.
