

# Mirko Krajcer

Student

## Profile

I would describe myself as an ambitious and motivated person interested in learning modern technologies and constantly improving. I am organized and strive to do everything according to a pre-conceived plan, although I manage well in situations that require a form of improvisation. Through years of working at a Sports and Language Camp in Greece, I came in contact with many European cultures, while developing the skills of working with others, as well as managing a smaller team of people.
